TOP QUALITY FILM WITH ECONOMICAL EXCELLENCE

Coveris Flexibles Austria GmbH is one of the leading producers of high-quality plastic films in which we offer the agricultural sector innovative high-end stretch films for the wrapping of silage bales.

Continuous research & development enables Coveris to manufacture an excellent performing blown stretch film with excellent mechanical properties .

This product is characterised by having more meters per roll allowing a higher amount of bales wrapped from the roll and coupled with less film changes, lowers the cost to the end user.

BENEFITS

- Excellent tear and puncture strength
- Reduced costs – more bales per roll
- Less roll changes
- Less film wastage
- Shorter machinery idle time

TECHNICAL DATA		
	TQ	TQ plus
WIDTH	750 mm	750 mm
ROLL LENGTH	1650 m	2000 m
THICKNESS	22 µ	19 µ
PACKAGING	30 reels / pallet	30 reels / pallet
UV-RESISTANCE	12 months, 110 - 180 kly / year	12 months, 110 - 180 kly / year

AVAILABLE IN THE COLOURS:

black

green

white

BENEFITS

EXCELLENT TEAR AND PUNCTURE PROPERTIES USING A THINNER GAUGE FILM

As the result of a unique production process, our thin gauge film has the same tear strength and puncture resistance as your usual 25-micron film.

REDUCED COSTS

More film per roll along with less roll changes and longer wrapping time help to reduce the costs.

LESS ROLL CHANGES

You can wrap up to 10% more bales with each roll and the wrapping process becomes even more efficient.

LESS FILM SCRAP

For the end user, film wastage is reduced by 12% per bale – that saves you money and is environmentally friendly.

SHORTER MACHINERY IDLE TIME

As a result of the greater run length, the work can be done with less interruptions and consequently quicker. As a result, the machinery has less idle time and can be used more effectively.

QUALITY & SERVICE

As an industry leader, Coveris Flexibles Austria GmbH is focused on quality.

Raw materials and finished products are assessed on an ongoing basis in our in-house lab to ensure very high quality standards.

Every roll core has its own serial number to allow easy tracing of problems. Our customer services team are available to you at any time.

Coveris highly recommends 6 layer wrapping for higher quality silage, less chance of mould and ultimately have less problems during stacking, storage and usage.
