

# UNTERLAND PEGASUS

## POWERFUL AND TIGHT STRETCH FILM FOR BALE WRAPPING

Coveris Flexibles Austria GmbH is one of the leading manufacturer of high-quality plastic films, offering the agricultural sector innovative, high-end stretch films for wrapping of silage bales.

Compared to other animals horses are very demanding concerning the quality of their feed. Bale haylage produces high-quality feed which contains only low dust and is therefore ideal for horses.

### BENEFITS

- Greater strength
- Greater resistance to penetration
- Adheres better
- Greater yield

## TECHNICAL DATA

|               |                                 |        |
|---------------|---------------------------------|--------|
| WIDTHS        | 250 mm                          | 375 mm |
| ROLL LENGTH   | 1500 m                          | 1500 m |
| PACKAGING     | 24 reels / pallet               |        |
| UV-RESISTANCE | 12 months, 110 - 180 kly / year |        |

## AVAILABLE IN THE COLOURS:

grass green

white

## ADVANTAGES

### GREATER STRENGTH

Hard stalks can penetrate the wrapping film. Pegasus is significantly stronger and can therefore bend hard stalks downwards during the wrapping process.

### GREATER RESISTANCE TO PENETRATION

The straw stubble left in the field can puncture the film when the bales are laid on the ground. Pegasus is significantly stronger, and therefore prevents the wrapped bales from being penetrated.

### ADHERES BETTER

Silage bales with haylage cannot be squeezed in the usual manner, and that is why more oxygen is pressed into the bales. Pegasus adheres better which prevents additional oxygen from entering them.

### GREATER YIELD

The optimized stretch performance guarantees an especially high yield.

Available at

## QUALITY & SERVICE

The wrapping of horse haylage with dry and woody stalks can cause problems. Therefore we offer a special blown extruded 3-layer stretch film which meets these requirements: **more powerful, tougher and tighter**

Raw materials and finished products are assessed on an ongoing basis in our in-house lab to ensure very high quality standards.

Every roll core has its own serial number, to allow easy tracing of problems. Our application engineers are of course available to you at any time.

### Our tip:

*Don't wrap your haylage bales for horses in dark colours. The strong thermal expansion of the bales encourages the production of condensation underneath the film. The unpleasant result is mould!*
